# INTRODUCING VIVID RED FLOWERING ORCHID PLANTS

WILL GROW ANYWHERE • THE PERFECT HOUSE PLANT

Esteemed Friend:

I want to introduce you to a rather new member of the Orchid Family, known as Epi-Cattleya Hybrids. These are **ever-blooming** orchids producing dozens of fiery red flowers on long sprays. They will grow in any kind of soil and bloom continuously.

They will grow in a desert home where the temperature soars to 110 in the shade, or in a cold home that goes down to 35 at night! They need no special care, or soil or fertilizer.

While most of them produce vivid red flowers, some come in blood-red, orange-red, plum, pink, and in rare pastel shades of peach, salmon, yellow or white. You take "pot-luck" with me as to color.

All plants will be rushed to you prepaid via AIR MAIL. Remember, these will begin to bloom for you within a few weeks after you get them. Mail your order today.

3 plants (with 3 flower spikes)	\$5.30
6 plants (with 6 flower spikes)	8.30
12 plants (with 12 flower spikes)	12.30
